

Shivam Kumar

Applied AI Engineer

Birmingham, United Kingdom | [linkedin.com/in/shivam-kumar-554395239](https://www.linkedin.com/in/shivam-kumar-554395239) | github.com/ShivamKumar20-AI

PROFILE

Applied AI Engineer focused on NLP, LLMs and practical machine learning. I build end-to-end AI systems: preparing data, fine-tuning and evaluating models, and deploying production-style APIs and interactive web applications with FastAPI, Streamlit and Docker. Twelve AI and machine learning projects, five of them live and publicly usable. AWS Certified AI Practitioner and CompTIA Security+ certified, with an additional responsible-AI perspective from work on the EU AI Act, GDPR and ISO 27001.

TECHNICAL SKILLS

AI & machine learning: Python, scikit-learn, Hugging Face Transformers, T5, DistilBERT, sentence-transformers, LangChain, RAG, FAISS, TensorFlow/Keras, PyTorch, XGBoost, NLP, computer vision, model evaluation

Deployment & engineering: FastAPI, Streamlit, Docker, GitHub Actions, REST APIs, Git/GitHub, Linux, SQL/SQLite, AWS, Azure, Fly.io, Streamlit Community Cloud

Data & evaluation: Data cleaning and preparation, feature engineering, time-aware train/test splits, ROUGE and classification metrics, error analysis, pandas, NumPy, Jupyter

Responsible AI & supporting background: AI governance, EU AI Act classification, GDPR data processing, ISO 27001 control mapping, NIST CSF

SELECTED AI / MACHINE LEARNING PROJECTS

RAG Compliance Chatbot Live | Python · LangChain · FAISS · Hugging Face · Groq / GPT-OSS 120B · Streamlit · PyPDF
A retrieval-augmented generation chatbot that answers questions over long regulatory documents using LangChain, FAISS, embeddings and a Groq-hosted LLM.

World Cup Predictor Live | Python · XGBoost · scikit-learn · pandas · NumPy · Streamlit · Kaggle API
A classical machine-learning application that predicts football match outcomes from team form, FIFA rankings, Elo ratings, head-to-head history, World Cup performance and match statistics.

Resume Screener | Python · sentence-transformers · MiniLM · FastAPI · Uvicorn
A FastAPI service that scores how well a CV matches a job description using sentence-transformer embeddings and cosine similarity.

Radiology Report Summariser Live | Python · PyTorch · Hugging Face Transformers · T5 · FastAPI · Docker · Fly.io · GitHub Actions
A transformer-based NLP prototype that turns the free-text findings of a chest X-ray report into a concise impression, using a fine-tuned T5 model.

Additional projects: GDPR Request Classifier, Visual Clothing Recommender, Sentiment Analysis API, CIFAR-10 CNN and API, Newsgroups Text Classifier, EU AI Act Risk Checker, QuoteFlow AI, GenAI Use Case Risk Screener — github.com/ShivamKumar20-AI

PROFESSIONAL EXPERIENCE

AI Compliance Specialist August 2025 – Present
Peak Cyber Institute, Remote (United Kingdom)

- Mapped 100+ security controls to the NIST Cybersecurity Framework, applying the structured analysis used in machine learning labelling and evaluation workflows.
- Reduced audit response time by 35% by centralising evidence repositories and building automated documentation pipelines with Python and Power Automate.
- Conducted gap analysis across 15 high-risk exposure areas, translating unstructured findings into structured, actionable outputs.
- Presented technical findings to senior stakeholders using clear, evidence-based communication.

Early Careers Cyber Security Analyst January 2025 – July 2025
LRQA Nettitude, United Kingdom

- Created control-mapping documentation aligning client environments to ISO 27001 and SOC 2.

- Supported 4+ successful client audits through evidence packs and compliance matrices, with zero critical findings raised.
- Facilitated 150+ assessments and tracked remediation actions end to end.
- Standardised assessment templates to improve process consistency and enable repeatable workflows.

Application Support / Integrations Analyst

September 2022 – December 2024

P&O Ferrymasters, United Kingdom

- Improved data-integration efficiency by 80% by redesigning data-flow mappings and refining legacy ETL-style processes.
- Enhanced mapping efficiency by a further 35% through iterative process improvement and technical documentation.
- Provisioned and reviewed user access in line with ISO 27001 governance standards.
- Built and tested Microsoft 365 Power Automate workflows, applying scripting logic and process-automation principles.
- Collaborated across cross-functional teams in structured, Agile-style delivery environments.

CERTIFICATIONS & TRAINING

AWS Certified AI Practitioner	Certified	Tenable One & Cloud Security	Completed
CompTIA Security+ (SY0-701)	Certified	Cybersecurity Compliance, Risk and Audit	Completed
Tenable Vulnerability Management Specialist	Completed	IT Career Switch AI Engineer Traineeship	Completed

EDUCATION

Self-directed AI / Machine Learning study — IT Career Switch — AI Engineer traineeship curriculum
Machine learning fundamentals, Python for AI, data handling and processing, deep learning, natural language processing, computer vision, Git/GitHub, AI deployment and MLOps.

WRITING

Building an AI Assisted Triage Layer for Data Subject Requests

A GDPR request classifier, and where it deliberately stops — Medium, 25 September 2026.

VALUE PROPOSITION

Seeking junior or associate AI Engineer, Machine Learning Engineer or Applied Scientist roles in any industry. Brings transformer fine-tuning, retrieval-augmented generation and classical machine learning, each shipped as a working application rather than a notebook, plus the governance awareness to recognise where an AI system should not be trusted.
