

SHIVAM KUMAR

JUNIOR AI/ML DEVELOPER | AWS CERTIFIED AI PRACTITIONER

Birmingham • British Citizen
• LinkedIn • GitHub • Website

KEY SKILLS:

- Machine Learning
- Natural Language Processing (NLP)
- Computer Vision
- Deep Learning
- Python
- TensorFlow & Keras
- Data Preprocessing & Cleaning
- Feature Engineering
- Model Evaluation & Optimisation
- AI Application Development
- API Development & REST APIs
- Amazon AI Fundamentals
- React & TypeScript
- Git & GitHub
- Data Processing & Visualisation

PERSONAL STATEMENT:

An aspiring AI professional with a background in IT and cybersecurity, particularly Governance, Risk and Compliance (GRC). Drawn to AI due to the rapid growth of the industry and the increasing ways it is being applied across technology and business. Through a recent AI traineeship, built practical skills in Python, machine learning, deep learning (CNNs, RNNs), natural language processing and computer vision, using frameworks such as TensorFlow and Keras, alongside Amazon AI Fundamentals. AI is seen as an area to apply cybersecurity and GRC experience while expanding knowledge and developing a deeper understanding of emerging technologies. A willingness to learn, a proactive approach, and the ability to take ownership support continued growth and positive contribution within the AI field.

TRAINEESHIP:

Mar 2026 – Sept 2026 IT Career Switch
AI Technician Traineeship

- **Machine Learning & Data Preparation:** Designed, trained, evaluated and optimised machine learning models, applying data cleaning, preprocessing, feature engineering and model evaluation techniques to practical business problems.
- **Deep Learning & Computer Vision:** Developed deep learning solutions using CNNs and RNNs, applying image preprocessing, feature extraction and model optimisation techniques to image recognition, pattern analysis and predictive modelling.
- **Natural Language Processing (NLP):** Built AI solutions to process, analyse and summarise unstructured text using text preprocessing, language modelling and transformer-based techniques.
- **AI Application Development & Deployment:** Built and deployed end-to-end AI applications, exposing machine learning models through APIs and deploying solutions within cloud-based environments.
- **AWS AI:** Developed practical knowledge of the principles of AI, its real-world applications, and the key AWS AI tools used to bring intelligent solutions to life.
- **Software Development Practices:** Applied version control, debugging, testing and technical documentation throughout AI projects, using structured development practices to troubleshoot issues and communicate technical concepts clearly.

Certification Gained: AWS Certified AI Practitioner

PROJECTS:

Portfolio Project #1 Natural Language Processing Project (Radiology Report Text Summarisation): Developed and deployed an AI-powered Natural Language Processing (NLP) application to generate concise summaries from free-text radiology reports. Applied data preprocessing, model training, evaluation, and API deployment techniques to deliver an end-to-end AI solution suitable for real-world use.

Key Skills Applied: *Natural Language Processing (NLP) | Data Preprocessing | Machine Learning | Model Evaluation | API Development | AI Deployment*

Portfolio Project #2 Computer Vision Project (Image-Based Fashion Recommendation System): Developed and deployed a computer vision application capable of recommending visually similar clothing items from user-uploaded images. Applied image preprocessing, feature extraction, deep learning, and model deployment techniques to deliver a fully functional AI recommendation system.

Key Skills Applied: *Computer Vision | Deep Learning | Image Processing | Feature Extraction | Model Deployment | AI Application Development*

CAREER HISTORY:

Aug 2025 – Present Peak Cyber Institute
POSITION HELD: AI Compliance Specialist

- **Compliance Mapping:** Mapped 100+ security controls to the NIST CSF framework, applying structured analysis transferable to ML labelling and evaluation workflows.

- **Process Automation:** Reduced audit response time by 35% by centralising evidence repositories and building automated documentation pipelines using Python and Power Automate.
- **Gap Analysis:** Conducted gap analysis across 15 high-risk exposure areas, translating unstructured findings into structured, actionable outputs.
- **Stakeholder Communication:** Presented technical findings to senior stakeholders using clear, evidence-based communication.

Jan 2025 – Jul 2025 LQRA Nettitude
POSITION HELD: **Cybersecurity Apprentice**

- **Compliance Documentation:** Created control-mapping documentation aligning client environments to ISO 27001 and SOC 2.
- **Audit Support:** Supported 4+ successful client audits through evidence packs and compliance matrices, achieving zero critical findings.
- **Assessment & Remediation:** Facilitated 150+ assessments and tracked remediation actions end-to-end.
- **Process Improvement:** Standardised assessment templates to improve process consistency and enable repeatable workflows.

Sep 2022 – Dec 2024 P&O Ferrymasters
POSITION HELD: **Application Support/Integrations Analyst**

- **Data Integration:** Improved data-integration efficiency by 80% and a further 35% by redesigning data-flow mappings and refining legacy ETL-style processes.
- **Access Governance:** Provisioned and reviewed user access in line with ISO 27001 governance standards.
- **Process Automation:** Built and tested Microsoft 365 Power Automate workflows, applying scripting logic and automation principles.
- **Agile Collaboration:** Collaborated across cross-functional teams in structured Agile-style delivery environments.

EDUCATION:

2026 AWS Certified AI Practitioner
 CompTIA Security+ (SY0-701)
 Vulnerability Management Specialist
 One & Cloud Security
 Cybersecurity Compliance, Risk and Audit

Nishkam High School Birmingham
2020 - 2022 3 A Levels, BTEC IT merit obtained

Nishkam High School Birmingham
2015 - 2020 GCSE's

TECHNICAL SKILLS:

- **Programming Languages:** Python, JavaScript
- **Machine Learning & AI:** Machine Learning, Deep Learning, CNNs, RNNs, Natural Language Processing (NLP), Computer Vision
- **AI Frameworks & Libraries:** TensorFlow, Keras, NumPy, pandas, FastAPI
- **Data Processing:** Data Cleaning, Data Preprocessing, Feature Engineering, Model Evaluation
- **Cloud & AI Services:** Amazon AI Fundamentals, real-world AI applications and Amazon AI tools
- **Deployment & DevOps:** Docker, Hugging Face Spaces, Render, PythonAnywhere, REST APIs
- **Version Control:** Git, GitHub
